PREFACE.

It seems very natural that a banker, using the moneys of the world, should turn his attention to forming a collection of them, and in this catalogue I describe the collection of the late Charles Gregory, banker of New York City and founder of the firm of Charles Gregory & Company, prominent in financial affairs of that city and still continued by his former partners. Mr. Gregory not only was a man of culture who was interested in coins, but he also formed collections of books, pictures and postage stamps.

He was for many years a member of the American Numismatic Society of New York, New York Historical Society, National American Numismatic Association, Union League Club, Seventh Regiment, of which we have many badges in the collection, and other societies. He was a member of the Stock Exchange from 1868 until his death last June.

There is one outstanding purpose evident in the mind of the collector of this immense collection and that was to form a series of the Dollars of the World, commencing with the earliest specimen of this large silver coin struck under Archduke Sigismund of Austria in the Joachimstal in 1484 and 1486. The standard was the Troy ounce of 480 grains.

The denomination was adopted by other silver producing principalities of Germany, but it was some sixty-seven years before it was adopted in England for the first time under Edward VI in 1551 and 155 years elapsed before the denomination was issued in France under Louis XIII in 1641. In France it was designated the ecu blanc or ecu white in contra-distinction to the ecu in gold, but was more commonly called the "Louis d'Argent de 60 sols", Louis of silver 60 sous. It comes thus entirely within the modern series. The denomination spread more rapidly southward. The first dollar of the Popes was struck by Sixtus V in 1588.

The invention of the denomination occurred most opportunely for Spain with her enormous importation of bullion from America and it was struck by Ferdinand and Isabel, and in enormous quantities by Philip II in the Netherlands and in Italy in the mints of Milan and Naples and Sicily.

These large coins, the largest that had heretofore been struck, were still made by the impression of dies struck by the hammer until the middle of the seventeenth century. The French did not actually issue them until after the adoption of the screw press. The press was used in England for shillings and sixpences of Elizabeth in 1567 and abandoned until Thomas Simon on the special coins of Oliver Cromwell re-employed it and used the sectional collar permitting the lettering of the edges; but it was again abandoned for a time and not finally adopted in England until the reign of Charles II.

The Dollars struck by the Kings of Spain are the rudest of their period. The dies are very crudely engraved and the pieces carelessly struck and the same may be said of the French testoons of the sixteenth century.

The late Mr. Gregory also collected a few representative Greek and Roman coins and specimens of the gold coins of the various countries.

In the United States series after a few representative specimens of the Colonial and State periods and the silver dollars, he was evidently attracted by the series of the Proprietary gold coins issued—the first series after the discovery of gold in the Carolinas and Georgia and the second after the discovery of gold in California in 1849. In each of these two series in his collection we find specimens of great interest and many of the highest rarity; commencing with the issue of Templeton Reid in Georgia in 1830, the collection contains his Quarter Eagle; and of the coins struck by Bechtler and his Son in North Carolina, very rare Five Dollars and Two and a Half Dollars, and then in the second or Western Series we find no less than twelve of the great $50 octagonal coins struck by Augustus Humbert, and two of the $50 round pieces of Wass-Molitor & Co. of 1855, and also their extremely rare $20 piece, and their first ingot stamped with the value as money. The series includes the excessively rare $5 piece of the type of the national coinage struck by Dunbar & Co. and the Quarter Eagle by J. Parsons & Co., and the extremely rare $20. by Clark, Gruber & Co. of Denver bearing the view of Pike's Peak.

Amongst the foreign gold coins is the great piece of Sigismund III of Poland, of seventy ducats, and amongst the war medals and decorations the excessively rare General Officer's medal in gold for Seringapatam.

In the series of Brunswick and Saxony to which Mr. Gregory gave particular attention are a large number of the multiples of the dollar in splendid preservation, and also in the later New Princely Houses the excessively rare $9 piece of Wenceslaus of Furstenberg.

Mr. Gregory never arranged his collection in a cabinet and to this cause we may attribute unexpected gaps and many duplicates.

I have arranged the collection geographically throughout, the ancient coins following the usual system from west to east and the European modern coins from the north to the south. I have thus placed all the coins of Germany in connection; and have not placed the coins of the Popes amongst the Princes of the Church of Germany as not belonging there geographically and because those Princes did not issue their coins as under the authority of the Popes and under the Papal monetary system or series, but solely as temporal rulers of Germany. I think this system will afford the greatest possible facility of reference to American collectors.

I have, as always, carefully described the coins in the several grades of preservation and where specimens are damaged I have mentioned the defects as it seems to me it is better to use the grade term of "good, fine, etc." as referring to the actual preservation from usage or corrosion and mention particular damages or defects than to try to grade down the coin on account of defect or damages because by the latter system the distant collector is given no knowledge of such defects.

I guarantee all coins and medals to be genuine unless otherwise described. In fact, I have removed from the collection all counterfeits with the exception of four or five well known reproductions, which are so described.

The Colonial, State and United States paper money will be found at the end of the catalog.

I have arranged 15 plates quarto 7x9¼ inches showing many of the principal coins, two plates European gold, ten silver, one Colonial and U. S. silver and two plates of rare proprietary gold coins. Price of plate catalog sent before sale and price list after sale $5. Price list alone $1.

I will faithfully execute orders for a commission of 5%. As is customary the right to execute such orders is reserved.

To expedite the long sale the rule that bids are to advance above 50 cents at the rate of 10% will be maintained.

Very respectfully,

S. H. CHAPMAN,
Numismatist.

AUGUSTUS HUMBERT UNITED STATES ASSAYER OF GOLD.
ACTING IN CONJUNCTION WITH MOFFAT & Co.

2316 1851 $50. UNITED STATES OF AMERICA. Eagle standing on rock, holds ribbon in beak, inscribed E PLURIBUS and holds in his r. talon shield and three arrows, in l., on the rock, olive branch; above bet. wings on scroll 880 THOUS, the figures punched in; below 50 (punched in) D C . Rev. 50 in centre of engine turned pattern. Edge 1851 AUGUSTUS HUMBERT UNITED STATES ASSAYER OF GOLD CALIFORNIA. Octagonal. Rev. has been smoothed off and the engine turning falsely re-engraved and without the outer band, and is cut *in* instead of being in relief—by which this fraud may be detected, wt. 1240 grs. should be 1306, otherwise fine. Pl. XV. A. 11. Mr. Adams, in his work "Private Gold Coinage," to which our final numbers refer, on page 57, describes this piece as a different rev. die through failing to perceive the false work, and loss of weight. I must mention

this so that collectors will not be seeking this variety. I described a similar fraudulent specimen in my sale of the Zug Collection, October 1909.

2317 1851 $50. Same type except for fineness 887 THOUS. Rev. Genuine, minute engine turning, wavy tracery of lines to diameter of size 23; a plain band and a ribbon like tracery along edge. Very good. Some nicks on margin and some long dents on rev. Wt. 1307 grs. Pl. XV. A. 12.
